

THINKSMARTER

HEAT YOUR HOT WATER FOR LESS

What is an iSmart Hot Water Controller™?

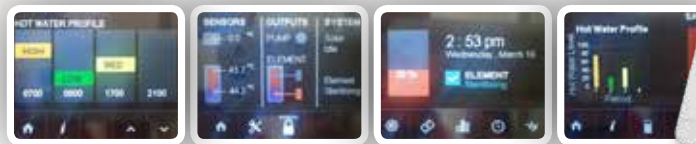

It may come as a surprise to some, but heating hot water in New Zealand homes can account for approximately 33% of our power bills, until now there has never been a real solution to fix the problem.

Some pretty clever kiwis have come up with some very smart technology helping you to manage your water heating, so you can save money without impacting on your hot water availability.

Introducing our break-through Kiwi technology, the iSmart Hot Water Controller™. More sophisticated than a timer, the iSmart Controller™ comes with an LCD touch screen so you can programme when you heat up your water, plans for periods of high use, can be boosted when you've got unexpected demand and minimise power use when away on holiday.

How does it work?

- Easy to use LCD colour touch screen You can programme what times you want hot water available
- Calculates if there is enough hot water and only heats up when required.
- Easily adjust the savings you want to make
- 'BOOST' Mode – if extra guests turn up or you want more hot water available
- HOLIDAY Mode – your hot water can be safely turned off while you are away
- Has legionella protection
- 7 days worth of data
- Comes with a 3 year warranty
- NZ made and manufactured in Auckland.

Did you know that up to

33%

of your power bill contributes to heating up your hot water?

Heat your hot water for less

With a qualified electrician the iSmart Controller™ can be retrofitted to any cylinder so there is no need to replace your cylinder.

Control the way you heat your water by investing in an iSmart Hot Water Controller™. Call our energy consultants today to find out more.

GIVE YOUR HOT WATER CYLINDER A MAKEOVER

**COMFORT AND
POWER SAVINGS**
AT YOUR FINGER TIPS

REPLACING YOUR HOT WATER CYLINDER?

By installing an iSmart Hot Water Cylinder™ you can take control of how you heat your hot water and save money.

Before installing a standard cylinder, take a look at the savings that can be made with an iSmart Cylinder™.

iSmart Hot Water Cylinder tanks come in various sizes: 180L, 250L, and 300L. There are additional options available including dual elements, stainless steel, solar ready, low pressure and wetback. Some tanks can be kept outside.

Control your hot water use and save money on your energy bills with this new iSmart technology. They are easy to install and your return on investment will be shown with the savings you make on your reduced power bills for years to come.
